

March 30, 1922.

Dr. P. A. Munz,
Pomona College,
Claremont, California,

Dear Sir,

I am working on the taxonomy, cytology and genetics of the genus *Crepis* for my Doctor's Degree. As I have had considerable difficulty in obtaining material, I am forced to make a wide appeal. Herbarium specimens and especially rare ones are desired of all North American species.

A number of persons are endeavoring to help me gather material. Miss Edna Spalding, a Teaching Fellow in our department, has kindly suggested you as one to whom I may address an appeal. Any services that you may be able to give me in this connection will be greatly appreciated and will you please pass the word along.

Very sincerely yours,

Helen Borgfried,

Associate in Botany.
